

Bayer's products and services are designed to help people and the planet thrive by addressing the challenges presented by a growing and aging global population. Bayer is accelerating its environmental ambitions by investing in sustainable products with a science-based action plan to drive climate neutrality, ensure our packaging supports environmental protection and promote collective action with consumers, industry peers and stakeholders.

As part of Bayer Consumer Health's commitment to the **Global Self-Care Federation's Charter for Environmentally Sustainable Self-Care**, we pledge to deliver more sustainable solutions by:

Plastics & Packaging

Sustainable Packaging - We commit to deliver by 2030, where quality and safety permit and regulations allow:

- **Recycle: 100%** of packaging to be recyclable or reusable, all packaging to include consumer friendly recycling information
- **Responsible: 100%** of all paper to be sustainably sourced (forestry certified or recycled content)
- **Reduce: 50%** of packaging to include recycled content
- **Remove / Replace:** Remove packaging where not needed and use less or replace with more sustainable materials where it is

Pharmaceuticals in the Environment

Zero effluent discharges - We will contribute to Bayer's goals:

- **Best practice:** Implement industry good practice to manage and reduce effluent discharges from 100% of its production sites
- **Collective Action:** Engage in industry initiatives and with other stakeholders to stimulate collective action for the safe disposal of pharmaceuticals and reduce the impacts of Pharmaceuticals in the Environment across our supply chain

CO₂ Footprint

Climate Neutral in own operations by 2030, Net Zero along value chain by 2050 - We will contribute to Bayer's goals:

- **Go Renewable and Increase Efficiency:** Purchase electricity only from renewable sources and invest in energy efficiency across our production sites to decrease our operational emissions by **42% by 2030**
- **Price Carbon:** Evaluate all facility enhancement projects using an internal carbon price
- **Collective Action:** Engage in global partnerships, including CDP's (formerly the Carbon Disclosure Project) Supply Chain program, to enable greenhouse gas emission reductions from across Bayer's value chain and the industry
