

Consumer Healthcare Products Association pledge concerning the **Global Self-Care Federation Charter for Environmentally Sustainable Self-Care**.

To demonstrate the U.S. industry's commitment to the principles in the charter, the Consumer Healthcare Products Association pledges to:

Plastics & Packaging

Encourage and shine a spotlight on CHPA member manufacturer efforts to promote the use of packaging materials that can be **recycled** or are **made from recycled material**.

Pharmaceuticals in the Environment

Promote use of the more than **20,000** drug disposal kiosks nationwide for consumers to safely dispose of unwanted medicines.

CO₂ Footprint

Encourage and shine a spotlight on CHPA member manufacturer efforts to **reduce their carbon footprint**.

Collect information annually on CHPA manufacturer member efforts through CDP annual reports or survey results to measure industry progress on environmental sustainability goals on packaging, environmental concerns, and CO₂ footprint efforts, as well as to seek new ways to improve sustainability practices.
