

FHCP's commitment to the **Global Self-Care Federation's Charter for Environmentally Sustainable Self-Care.**

Food, Health & Consumer Products of Canada (FHCP) is committed to sustainability. This is why we have endorsed the **Global Self-Care Federation's Charter for Environmentally Sustainable Self-care** to build on our work to advance environmental stewardship, because it's good for the planet, good for business, and we know it's what Canadians expect.

Plastics & Packaging

We are proud to be the first national trade association in Canada to endorse the **Ellen McArthur Foundation's** vision for a new plastics economy – a future of zero plastic waste. FHCP is also founding partner in the Canada Plastics Pact, where together we will rethink the way plastics are designed, used and reused, charting a path forward toward a circular economy so that plastic never becomes waste.

Pharmaceuticals in the Environment

Through our endorsement of the GSCF Charter, FHCP's member companies have the opportunity to commit to specific targets addressing priority areas of collective action to **advance the circular economy, encourage the safe disposal of medicines and reduce carbon emissions.** FHCP will promote the Charter with our members and encourage them to sign on to this global commitment to help achieve the principles of sustainable self-care.
