

At Johnson & Johnson Consumer Health, our mission is total health – for individuals at every stage of life, for communities around the world, and for our planet. In 2020, we introduced our Healthy Lives Mission: a 10-year ambition to advance human health while also protecting our planet.

That's why we are proud to support the **Global Self Care Federation's Charter for Environmentally Sustainable Self-Care**.

Plastics & Packaging

Through our Healthy Lives Mission, we are working to reduce our overall packaging footprint, innovating to make our packaging easier to recycle and increasing our use of recycled plastics and paper. We pledge to:

- Eliminate problematic or unnecessary plastic packaging where technically feasible by **2025**
- Use **100%** certified or post-consumer recycled paper and pulp-based packaging by **2025**
- Invest in partnerships and cross-industry collaborations to address design challenges

Pharmaceuticals in the Environment

We pledge to:

- **Increase patient and consumer awareness about the safe disposal of medicines**

CO<sub>2</sub> Footprint

As part of the Johnson & Johnson Family of Companies, we are working towards the following climate goals:

- By **2025**, source **100%** of our electricity needs from renewable sources
- By **2030**, achieve carbon neutrality for our operations, reducing absolute Scope 1 & 2 emissions **60%** from **2016 levels**
- By **2030**, reduce absolute upstream Scope 3 emissions **20%** from **2016 levels**
