

P&G Personal Healthcare is committed to improving all lives through trusted, preferred, quality healthcare brands, enabling every product to deliver a positive impact on people's lives while leaving a minimal environmental footprint. We believe that for people to thrive and our planet to flourish, we must go beyond business as usual. Through our actions and products, we strive to be a force for good that helps restore the health of people and our planet today and tomorrow.

Plastics & Packaging

Minimize our environment lifecycle impact by encouraging and enabling responsible consumption and disposal.

- **100%** recyclable or reusable packaging by **2030**
- Meaningful increase in responsibly sourced bio-based, recycled or more resource efficient materials by **2030**
- Work to **reduce packaging redundancy** where possible

Pharmaceuticals in the Environment

Minimize our environment lifecycle impact by encouraging and enabling responsible consumption and disposal.

- Actively participate in **Drug Take Back programs** with key partners and stakeholders to educate and encourage proper disposal (ie AESPG, PPSWG)

CO₂ Footprint

Reduce our environmental footprint and strive for circular solutions.

- P&G has committed to net zero greenhouse gas emissions across our operations and supply chain by **2040**
- Purchase **100%** renewable electricity by **2030** for owned manufacturing sites
- Maintain **zero manufacturing waste to landfill**
- Drive **efficient and energy-saving logistic streams**
